V. Read the passage and then tick T (True) or F (False)

There are three major forms of fossil fuels: coal, oil and natural gas. All three were formed many hundreds of millions of years ago before the time of the dinosaurs – therefore we call them fossil fuels.

Fossil fuels take millions of years to make. But they are not unlimited. We are using up the fuels that were made more than 300 million years ago. They are not renewable like solar power, wind power, hydro power.

We can save fossil fuels by conserving energy. One simple way to do this is to turn off appliances, TVs and radios that we are not using. We can also turn off lights when no one

is in the room. Another way is to go by bike or walk instead of driving cars or motorbikes.

Statements	T	F
1. Three major forms of fossil fuels are oil, coal and natural gas.		
2. They were formed right after the time of dinosaurs.		
3. Fossil fuels are limited.		
4. Hydro power and solar power are non-renewable sources.		
5. Conserving energy is a good way to save fossil fuels.		

VI. Read the passage again and answer the questions

My uncle is working at a car company. His company is now developing a new flying car. The car will have solar panels on its roof and wings, and it will charge its battery as it moves. During light traffic, you can use roads. But in heavy traffic, you can use the flight mode to avoid traffic. It will be able to carry eight passengers. The car will have an autopilot function, so a driver is not needed. All passengers can relax, read books or play games while travelling.

I was worried about the safety because it is driverless, but my uncle said it will be much safer than a traditional car. It will also be more comfortable and greener because it is solar-powered.

1. How will the car be powered?

.....

2. When will its battery be charged?

.....

3. What can it do during traffic jams?

.....

4. What can passengers do when the car is running?

.....

5. Why is it greener than a traditional car?

VII. Read the text about the film *The Theory of Everything* and answer the questions that follow.

The Theory of Everything is a biographical film, directed by James Marsh in 2014. It stars Eddie Redmayne and Felicity Jones.

The film is about the life of the scientist Stephen Hawking. It was adapted by Anthony McCarten from the book *Travelling to infinity: My life with Stephen* by the scientist's wife, Jane Hawking. The film is set in England in the early 1960s. It tells the story of Hawking's relationship with his wife, the diagnosis of his motor neuron disease and his success in the field of physics.

The film received positive reviews. People say it is a must-see. I agree, because the story is moving and the acting is excellent. The music is also incredible. Although *The Theory of Everything* is a little sad at times, its story is very interesting and there is a lot of action. Go and see it if you can.

1. What kind of film is *The Theory of everything*? _____

2. Who stars in it? _____

3. What is it about? _____

4. What book was it adapted from? _____

5. What do people say about the film? _____
